## Technical Skills

---

### Languages

**Programming:** Python, C++, React.js, Javascript, SQL

**Markup:** L<sup>A</sup>T<sub>E</sub>X, HTML, CSS

### Database Management Systems

MongoDB, PostgreSQL, MySQL

### IDE

Microsoft Visual Studio, Visual Studio Code, XCode, IDLE

### Version Control

Git

## Projects

---

### Web Reads

Created the front-end and worked with the back-end for an application, called “Web Reads” mostly using the JavaScript frameworks React and Express, and a MongoDB database. This application uses machine learning to recommend books for the user based on their previous reading history.

### Campus Management System

Created a CRUD application using React and Express that allows users to add campuses to a Postgres database, as well as students belonging to these campuses. Users were then able to update any information in the database as well as delete it.

### Portfolio

Created and deployed a portfolio website to display my other projects, using React, Next.js and Tailwindcss. This site is currently deployed at <https://www.codedbychris.me/>.

## Education

---

### Bachelor’s in Computer Science

Hunter College - New York City

## Job Experience

---

### E-Commerce Associate (12/2020 - Present)

**Whole Foods Market, New York, NY:** Scanned items, using handheld mobile device, for orders placed. Acquired highest metrics in the team. Worked as a team to complete orders that customers placed online.
